

A PCA plot showing the first two principal components, PC1 (x-axis) and PC2 (y-axis). The x-axis ranges from approximately -2 to 16, with major ticks at 0, 5, 10, and 15. The y-axis ranges from approximately -10 to 10, with major ticks at -10, -5, 0, 5, and 10. The plot displays three distinct clusters of data points, represented by different colors: blue, orange, and grey. The blue cluster is located in the upper left quadrant, with points ranging from PC1 ≈ -1.5 to 1.5 and PC2 ≈ 2 to 10. The orange cluster is located in the lower left quadrant, with points ranging from PC1 ≈ -1.5 to 2 and PC2 ≈ -8 to -2. The grey cluster is located in the lower right quadrant, with points ranging from PC1 ≈ 0 to 2 and PC2 ≈ -8 to -2. There is a small overlap between the orange and grey clusters. A single blue point is an outlier at approximately (15.5, -2.5).
